GlobalDining Reports Significant Wireless Use via Palm® i705 Handheld

Wireless Restaurant Directory is simple tool for Consumers and Restaurants

GlobalDining, the **world's largest, most consulted location-based mobile restaurant directory and Restaurant Promotional Tool**, today announced that it has served up over 250,000 Page Views in the first month of availability via the newly released i705 wireless handheld from Palm, Inc. The GlobalDining wireless application is integrated into the MyPalm™ portal, accessible via the new Palm i705 wireless handheld as part of the Palm.Net® wireless service.

“When Palm agreed to bundle the GlobalDining application into the MyPalm portal, we knew there would be significant interest out there – we are truly pleased at this remarkable consumer acceptance during the first month of distribution”, Said J R Nardulli of GlobalDining. Nardulli added, **“While these numbers might appear to be small in Internet terms, we believe they represent significant evidence that the new medium for reaching consumers is the Wireless and, increasingly, the public is understanding the value of these services. Palm is the only major player delivering Location Based Service capability every day, and because of this we are able to bring real value to the Medium.”**

About GlobalDining Visit us at www.globaldining.com, wap.globaldining.com or contact us directly.

GlobalDining.com offers the world's largest and most comprehensive Internet directory of restaurants together with a developing Global Reservation Network. The Company has Patents pending in the US and Europe for its restaurant reservation technologies that enable wireless reservations on a global scale without the use of proprietary equipment or software at the restaurant level. GlobalDining works with Telecommunication Systems, Inc, Nextel, ATT Wireless, Motorola, Maptuit, Nokia, Telespatial, Platinet Communications and others.

GlobalDining is a Founding Member of the L.I.S.A™ advanced Cellular Services consortium. www.getlisa.com

Palm.Net is a registered trademark and Palm and MyPalm are trademarks of Palm, Inc.
