

PRESS RELEASE April 6, 2001

GLOBALDINING ANNOUNCES WAP AVAILABILITY

Service Introduction a Success

GlobalDining.com, a pioneer in the realm of wireless restaurant innovations, announced today that the WAP interface to its worldwide restaurant information service is available for use by the general public and the global restaurant trade.

After undergoing rigorous field trials in association with multiple enterprise partners both in the US and in the EU, CTO Kelly Corkill said: "It's very pleasing to see our WAP product fly through these trials. And the synergy between the WAP application and our Web tools makes this a powerful and convenient way for restaurateurs and customers to get together." Included in the partner products are: Motorola, SignalSoft, Maptuit and Telespatial.

GlobalDining's Products and the WAP interfaces have been showcased at a number of worldwide congresses and expositions. Motorola and Maptuit both highlighted the Company's offerings at the GSM World Congress in Cannes, France in February. A European WAP interface to the Company's Internet directory was featured by Motorola last month at CeBIT in Germany and the very successful CTIA annual show in Las Vegas included featured demonstrations of the Company's location enabled WAP interface by Motorola, SignalSoft and Maptuit.

Jim Nardulli, CEO of GlobalDining, said: "Our products have generated tremendous interest at recent shows, demonstrating the power of a truly useful application to build traffic and revenue on a network. The visitor log at our office has filled up recently and it is very rewarding to be in discussions with so many highly respected equipment and network providers."

About GlobalDining

GlobalDining.com offers the world's largest and most comprehensive Internet directory of restaurants, with a full featured website at www.globaldining.com and fully functional WAP site at wap.globaldining.com. The Company has Patents pending in the US and Europe for several of its restaurant reservation technologies that it believes will finally enable wireless reservations on a global scale.

GlobalDining is a Certified Alliance Partner of Boulder's SignalSoft Corporation, a worldwide leader in wireless location based services. Other strategic partners of the Company include Motorola (MOT) and Maptuit, a leading supplier of eGeo services worldwide with offices in Denver, Toronto, and Burlington, Massachusetts.
