

Agreement with GlobalDining provides Aspiro with key application and revenue stream

Aspiro has signed an agreement with application provider GlobalDining for its worldwide restaurant directory and reservation network. This unique agreement provides Aspiro with revenue streams as well as an attractive key application.

Aspiro today announced an agreement with GlobalDining, the world's largest, location-based mobile restaurant directory and reservation network to deliver GlobalDining's services. Aspiro's customers among mobile network operators and partners throughout Europe, the Middle East and Asia will be offered an application which not only provides an excellent source of restaurant information for end users, but also allows them to make real-time table reservations directly from their mobile device.

This unique agreement, which is entirely subsidized by participating restaurants, will, for the first time, provide Aspiro with a revenue stream from an application provider.

GlobalDining's services today include over 500,000 restaurants in over 40 countries and 18,000 cities.

"We're excited by the opportunity to market GlobalDining's restaurant directory and services to our customers. Recent wireless use studies indicate that finding a restaurant is the most popular use of mobile data services in Europe. GlobalDining's service is by far the best available," says Lena Wittbjer, CEO at Aspiro.

James Nardulli, GlobalDining CEO, said, *"Aspiro is defining the leading edge of mobile data services. We are immensely pleased that such an organization sees the value we can bring to the mobile internet."*
