

**PRESS RELEASE** June 14, 2001

---

## **GLOBALDINING DEMONSTRATES LBS SERVICES IN ROME, ITALY**

### ***International Restaurant Directory Available via WAP***

GlobalDining, the **world's largest, location-based mobile restaurant directory** will be highlighted at the IBC Mobile Location Services conference in Rome, Italy, June 19 through 21, 2001, as part of SignalSoft Corporation's local.info Alliance program. The local.info Alliance is a consortium of content, application and service providers for developing and delivering location-based information services to wireless network operators worldwide.

"The ability to find a restaurant anywhere in the world, connect to the restaurant with one touch, and then receive precise directions right to that restaurant's front door, all from your cell phone – finally a mobile data service that makes sense," said James Nardulli, CEO.

The GlobalDining/SignalSoft demonstration, which will be available on both Compaq iPAQ™ and WAP-enabled mobile devices, includes GlobalDining's location-aware restaurant directory with multiple features including search by cuisine type or proximity, one touch dialing, and turn-by-turn directions to the selected restaurant (provided by GlobalDining partner and SignalSoft local.info Alliance member, Maptuit Corporation).

"People everywhere are hungry for technology that makes their lives easier. We feed them by providing a mobile restaurant directory with more than 500,000 restaurants listed around the world and by giving users the option of calling that restaurant with one touch or receiving point by point directions. And soon we'll be able to offer real time reservations as well – all from WAP or SMS-enabled mobile devices. What could be better than that?" said James Nardulli, CEO.

GlobalDining's demonstration will be highlighted in SignalSoft's Booth #4 at the IBC Mobile Location Services conference in Rome, Italy, June 19 through 21, 2001.

GlobalDining's products and the WAP and XML interfaces have been showcased at a number of worldwide congresses and expositions. Motorola and Maptuit Corporation both highlighted the Company's offerings at the GSM World Congress in Cannes, France in February. A European WAP interface to the Company's Internet directory was featured by Motorola in March at CeBIT in Germany and the annual CTIA show in Las Vegas this April included featured demonstrations of the Company's location enabled WAP interface by Motorola, SignalSoft and Maptuit. GlobalDining has also been showcased in SignalSoft local.info demonstrations at the following congresses and expositions: the IBC Mobile Location Services conference in McLean, Virginia, April 25 to 27, 2001; the UWCC Global Summit in Orlando, Florida, May 1 to 3, 2001; and the 3G World Congress in Hong Kong, China, June 11 to 15, 2001.

**About GlobalDining**     [www.globaldining.com](http://www.globaldining.com) and [wap.globaldining.com](http://wap.globaldining.com)

GlobalDining.com offers the world's largest and most comprehensive Internet directory of restaurants, with a full featured website at [www.globaldining.com](http://www.globaldining.com) and fully functional WAP site at [wap.globaldining.com](http://wap.globaldining.com). The Company has Patents pending in the US and Europe for several of its restaurant reservation technologies that it believes will finally enable wireless reservations on a global scale.

GlobalDining is a Certified Local.info Alliance Member of Boulder's SignalSoft Corporation, a worldwide leader in wireless location based services. Other strategic partners of the Company include Motorola (MOT) and Maptuit, a leading supplier of eGeo services worldwide with offices in Denver, Toronto, and Burlington, Massachusetts.
